Training Program Announcement!!

Foam Ethanol Technician

This 8-hour training program covers a range of issues including foam equipment, foam types, foam application and provides an opportunity to utilize the latest foam equipment. This class is an excellent follow-up program to the *"Responding to Ethanol Incidents".* Traditional methods of firefighting against gasoline and other hydrocarbon fires have been found to be ineffective against new polar solvent-type/ethanol-blended fuels creating different foam application and extinguishment challenges. Current issues regarding the potential harm from firefighting foam will be discussed including the latest information available.

Saturday, February 20, 2027 @ 8:00 am

Lebanon County Dept. of Emergency Services

1805 Cornwall Road

Lebanon, PA 17042
